Definition

"Set of technologies of accurate predictions of the next best action"
Aneech Chopra

Machine Learning
Deep Learning

4

AI= Data

- Algorithm/neural networks
- Predictive Analytics (Regression)

WHY Now?

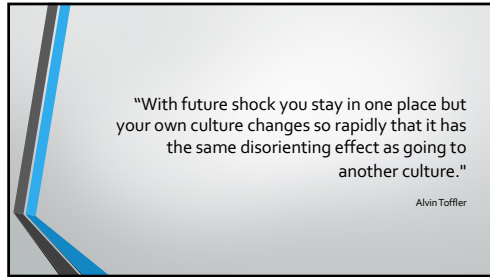

5

People Who Eat Carrots.....Die

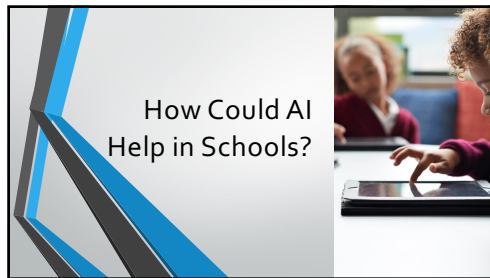

- Garbage In, Garbage Out
- AI takes the average
 - More misinformation-more issues
- Sponsored sites

6

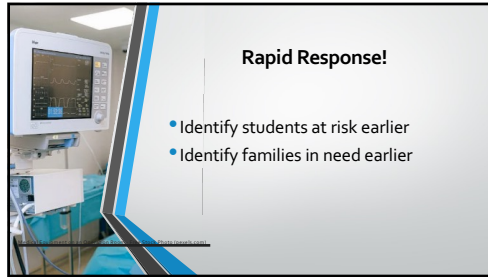

7

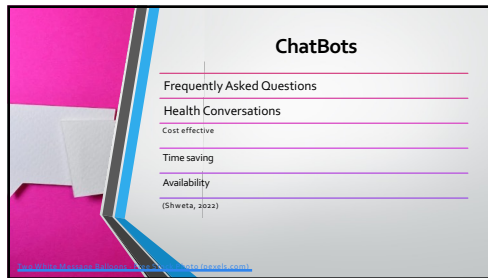

8

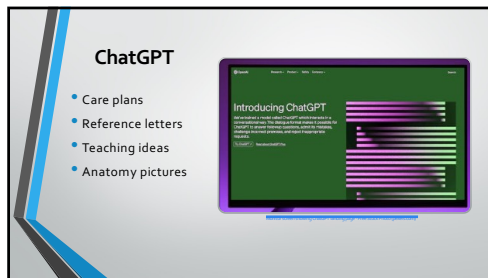

9

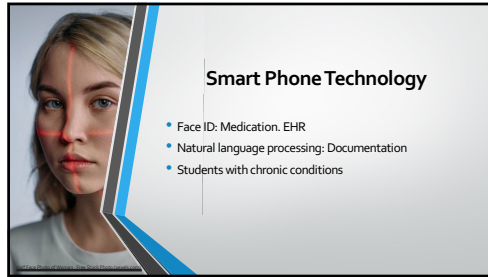

10

11

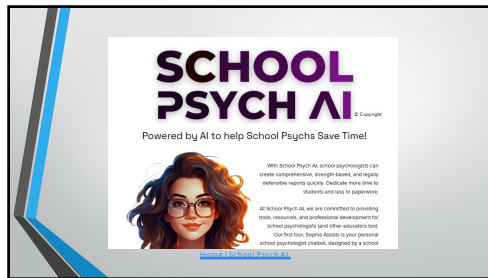

12

Smart Phone Technology

- Face ID: Medication, EHR
- Natural language processing: Documentation
- Students with chronic conditions

13

SCHOOL PSYCH AI © Copyright

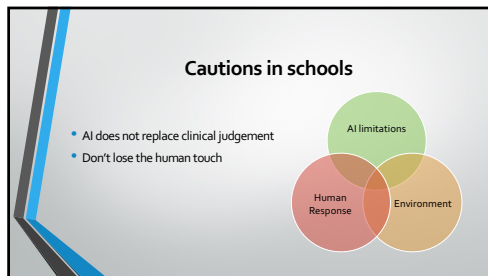

Powered by AI to help School Psychs Save Time!

With School Psych AI, school psychologists can create comprehensive, targeted, and engaging deliverable reports quickly. Dedicate more time to students and less to paperwork.

All School Psych AI we are committed to providing tools, resources, and professional development for school psychologists and other education field. Our first goal, before diving to your content, school psychologist chatbot, designed by a school

14

Cautions in schools

- AI does not replace clinical judgement
- Don't lose the human touch

15

Takeaways

- Spark ideas
- Identify learning patterns
- Triage
- Prioritize time
- Increase efficiency
- Improved documentation

16

Group Discussion

17

“Tools and technologies do not exist in a vacuum; they are shaped, for good and ill, by the culture in which they are created.”

Jonathon Jarry
